

Enabling Mobility Challenges

“The sophistication and rapidity of technological advancements in mobility is matched by the evolution of threats against mobile devices, networks, applications, and the mobile technology supply chain overall.”

DHS Study on Mobile Device Security

“Mobile devices pose a unique set of threats, yet typical enterprise protections fail to address the larger picture. In order to fully address the threats presented by mobile devices, a wider view of the mobile security ecosystem is necessary.”

NIST Mobile Threat Catalogue

- Departments / Agencies have already invested in mobility.
- What is the best way forward to protect your organization / people, and create IT efficiencies?
