

Secure Mobility Challenges

Security and hacking trends change overnight and how do we take proactive steps to eradicate or mitigate the vulnerabilities?

For all the government and industry more and more organization are moving towards securing the mobile computing environment whether it is for internal mission, public applications, or defending our nation. The role of mobility is driving workplace efficiency, flexibility, and this transition is leading to more challenges for the safety and integrity of government data.

How can we be smarter to secure mobility and outsmart the bad ones?

AFCEA-GMU Critical Issues in C4I Symposium
May 24-25, 2017
George Mason University Johnson Center, Fairfax, VA

Panelist

Greg Youst

DISA

“Mobility product security certification processes”

Rick Walsh

Army

“Higher learning needs for security capabilities in Mobility”

Anitha Raj

ARAR Technology

Chair - Mobility, AFCEA Technology Committee

Rob Anderson

IBM

“Enabling Mobility challenges”

Larry Taylor

AT&T

“Road to Secured Mobility in Defense & Intel”

Mike Wilkerson

VMWare

Moderator
